Mathlets

Ordinary Differential Equations Manipulatives (“Mathlets”)

This course employs a carefully developed set of dynamic computer applets called “Mathlets.” They are used in lecture occasionally. Each problem set contains a problem based around one or another of them. [\(PDF\)](#)

[The Mathlets Gallery](#) can be found on the MIT Interactive Mathematics Site. Each Mathlet has an associated “Help” file which will open in a new window and provide user instructions.

Funding for the development of the Mathlets was provided by a grant from the [The d’Arbeloff Fund](#) for Excellence in MIT Education as part of The d’Arbeloff Interactive Mathematics Project (d’A I M P).

Watch a [video](#) about the story behind the development of the Mathlets.
